### Thoughts from your sales representatives

#### *Jerome® is the better choice!*

With the proven reliability of the gold film sensor and the growing need for lower detection we came out with the Jerome® J405 model. With the detection limit able to read accurately down to 0.5 micrograms per cubic meter it meets EPA & ATSDR cleanup levels. Once again, the J405 establishes Arizona Instrument as the leader in portable mercury vapor detection.

Also, the J405 is a great alternative to UV spectroscopy for cleanup in residential areas. The J405 doesn't respond to hydrocarbons like UV technology does.

#### *How small is a part per billion?*

	1 part per million (ppm)	1 part per billion (ppb)	1 part per trillion (ppt)
Money	1 cent/ \$10,000	1 cent/ \$10M	1 cent/ \$10B
Time	1 minute/ 2 yrs	1 second/ 32 yrs	1 second/ 32 centuries
Length	1 inch/ 16 mi	1 inch/ 16,000 mi	1 inch/ 16M mi

### Need training or field service?

Come visit our manufacturing facility in Tempe, Arizona for in depth Jerome® training.

Contact our Customer Service Department for more details at 800.528.7411 or [Email Us](#).

#### What trainings are available?

-Jeff Castro, Customer Service Representative

### Consumable Parts and Extended Warranties

Contact Nancy Thiede for your consumable parts and extended warranties. We stock all parts for our instruments at our facility, so that we can ship out orders within 48 hours after the order is placed. If you don't have a part number or you are looking for pricing of a part please call her and she can help you with that as well.

Jerome® J405  
Low Level, Portable Monitoring Solution for Mercury Vapor Analysis

- Detects down to .5µg/m<sup>3</sup>
- Fast response times
- On board data logging
- USB Communications
- GSA Contractor
- Light, ergonomically designed case
- Gold film sensor
- Meets EPA regulation for acceptable cleanup level
